

SITA MOBILE APPLICATION

REVOLUTIONIZE YOUR IoT DEVICE MANAGEMENT

Effortlessly monitor, install, configure, and sync your IoT devices. Collect accurate readouts, and streamline data synchronization.

FULL CONTROL AT YOUR FINGERTIPS

Experience seamless data collection and BLE on-site operations with the SITA mobile application. Enjoy a flawless user experience and effortless diagnostics. All at your fingertips, with no need for visual contact with your IoT device!

GET MORE OUT OF YOUR ASSETS

- manage locations, IoT devices and meters
- create tasks for fitters

INSTALL WITH EASE

- simply click 'Install' and enter or scan the web service address

USE VARIOUS CONNECTION METHODS

- manage communication methods
- optimize the operation of the IoT devices

STAY SAFE

- access to the application is protected with passwords and permissions

DEVELOPED FOR VARIOUS IoT DEVICES

SITA supports various IoT devices, such as the APULSE or OKO series, as well as individual 3rd party devices and utility meters. Its compatibility encompasses a wide range of devices, enabling seamless integration and efficient management across diverse IoT ecosystems.

DUAL OPERATING MODES

SITA offers two operational modes: on-line mode, which is facilitated by service providers such as utility distribution companies, and offline mode, specifically designed for individual users without a supporting system.

HARDWARE SPECIFICATIONS

- Operating system: minimum Android 11.0 recommended Android 12.0 (max. Android 13), minimum iOS 13.0
- RAM: minimum 2GB, recommended 4GB

LANGUAGE

- The language of the SITA application is based on your phone's language and region settings.
- Currently supported languages: English (en-GB) Polish (pl-PL)
